Dear Business Leader:

The **STEM-O-RAMA** is an event where STEM programs and projects are promoted and displayed by local businesses, universities, clubs, and community organizations. Cub Scout Packs, Scouts BSA Troops, Venturing Crews, Explorer Posts and Sea Scouts Ships will put on displays and demonstrations. Over 21,000 Scouts and family members will be invited to come and enjoy the fun events. Businesses make a wonderful contribution to this council-wide event, and we invite you to be a part of our event's success!

Objective of this event:

- Bring about awareness of the importance of STEM to the community. The impact that this will have with the advanced technology we use everyday and that they will apply to be Prepared. For Life!
- Provide "hands on" activities to stimulate creative minds and bring about their potential who they can become and how valuable they will be to the future workforce.
- Create partnerships in the community with STEM businesses and how they can support STEM Scouting, STEM NOVA programs, etc.
- The Grand Teton Council needs funding to keep our after school programs running for the youth. These youth fees are a gift from your generous donations to participate!

With the help from the community and business owners through generous sponsorships, we can help our youth become better citizens and be the people that they need to become-our future leaders, scientists, doctors, respective business owners in our community, etc.

Above all, can we count on your support?

Let me know if you have any questions.

Thank you!

Elias Lopez | District Director
